

OJAS.R.SUKE

ojassuke56@gmail.com linkedin.com/in/ojassuke Nagpur, Maharashtra, India

Education

Shri Ramdeobaba College of Engineering and Management
B.Tech in Artificial Intelligence and Machine Learning

Nagpur, India
2021 – 2024

Government Polytechnic College, Nagpur
Diploma in Information Technology

Nagpur, India
2018 – 2021

Experience

Application Developer, IBM, India

Nov 2024 – Present

- * Working on large-scale enterprise application development and system migration at IBM, delivering full-stack solutions across Java, ABAP, and cloud-integrated data workflows on SAP S/4HANA to support critical business operations.
- * Designed and maintained enterprise application components, REST-based integrations, and data services within a complex multi-system environment, while driving code quality through structured remediation and performance analysis.
- * Provided production support in a live enterprise setting, resolving application failures under SLA pressure, and adopted AI-assisted development tooling to accelerate delivery and technical documentation.

Frontend Developer Intern – React Native, Campaa, India

2021

- * Built reusable React Native UI components for Android, integrated REST APIs, and improved responsiveness across multiple screens in an agile team environment.

Projects

StreamIQ – Cloud-Native Video Streaming Platform

Live

- * Designed and built a full-stack video streaming platform to showcase cloud-native application development, enabling users to upload, process, and stream video content on demand through a scalable cloud-hosted infrastructure.
- * Architected the backend as a containerised service with a RESTful API layer, integrating cloud object storage for video assets and a relational database for metadata, deployed via automated CI/CD pipelines for consistent and repeatable releases.
- * Demonstrated practical cloud engineering competencies including containerisation, infrastructure automation, and cloud storage integration across the full development and deployment lifecycle.

Curved Lane Detection Using Computer Vision

- * Developed a real-time lane detection system for curved road geometries, targeting autonomous driving assistance with robust performance under varied lighting and road conditions.
- * Implemented a multi-stage image processing pipeline encompassing noise reduction, edge detection, region-of-interest masking, and polynomial curve fitting to accurately model non-linear lane boundaries.
- * Achieved approximately 90% detection accuracy across image and video inputs, validated under controlled test conditions.

Technical Skills

Cloud & DevOps: AWS, Docker, CI/CD Pipelines, Jenkins, GitHub Actions, Kafka, Linux, Git

Web & App Development: Java, Python, JavaScript, React, React Native, Node.js, REST APIs, PostgreSQL, SQL

Enterprise & SAP: SAP S/4HANA, ABAP, ABAP OO, CDS Views, RAP, OData, SAP Fiori, BAPIs, BADIs, Eclipse ADT, SAP Joule AI

AI & ML: Machine Learning, Computer Vision, OpenCV, NumPy, Python (Data)

Certifications

- * SAP Certified Associate – Back-End Developer (ABAP Cloud)
- * Microsoft Certified: Azure Fundamentals – AZ-900
- * Red Hat Certified Specialist in Containers – EX188

Achievements

- * Silver Medal – Diploma in Information Technology (2022): Awarded for academic excellence at Government Polytechnic, Nagpur, recognising consistent high performance across core technical subjects.
